Ad. Agassiz

Museum of Comparative Zoölogy,

Mr 3/87

CAMBRIDGE, MASS.

My dear Pinn

I have just rec'd from the Dept & find your note of the 17. Oct. I hear that a petition has been sent from members of Am. Acad'y. asking that Hilgard be appointed as 2d Line Surveyor. As the list covers all the Dep't of Comb. whose signature would be of value I suppose I must do any thing more. Notify

you think I can be of
further use of course command
me

Yours

Ai Agassiz

My dear Sir

In answer to your of Sept 30 enquiring abt. Prof. Clark. all I can say is that he has delivered some very good Lectures in the Museum at Cambridge on my special subjects. He delivered a course of Lowell Lectures in Boston last year which were well attended. He knows enough to make his Lectures attractive and I see no reason why his Lectures should not be interesting. Prof. Asa Gray of Cambridge could perhaps be able to give you more definite information than I can as Mr. Clark has had no connection with the Museum for the last eighteen months

very truly yours
Alex. Agassiz

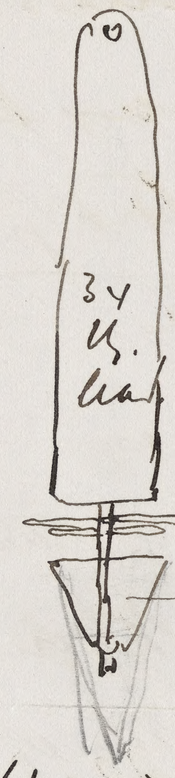
Diving Bell (apparatus)

May 3/79

My dear Sir

I send a Museum Bulletin which gives an sketch of Bulknap machine for small quantities. If more is needed a small ship can be made by any blacksmith see Drawings in "Depths of the Sea" by Wyville Thomson. The Bulknap machine is made at Washington under care of Coast Survey Should think for purposes

wanted a common head
30 - 35 ft. with cup and
leather slap. shd be supplied.



Heard from King a couple
days ago. He decided
against buying the Aspen
ranch but for buying

the 12000 head of cattle
beyond what capital
called for. Must have
will supply the funds if
this 2000 might & enables us
to ahead must factor
Now waiting for the
8000 head alone to
multiply

Yours truly

Mes chers Messieurs

J'ai reçu votre lettre m'annonçant votre élection comme Professeur au Museum à M. Woodworth qui a la direction du Musée de Cambridge pour le moment. Ce qui n'a rien à voir là quoique j'y travaille toujours. En ce moment il n'y a personne qui s'occupe spécialement des Mollusques. Mr Faxon a la charge des Crustacés Mollusques et M. Woodworth

des Annelides mais nous n'avons personne pour les Echinodermes et Echinodermes.

J'espère que à ma prochaine visite à Paris j'aurai le plaisir de vous voir à la Rue Buffon

Remy de votre part l'assurance de nos meilleurs sentiments
